

Question 2:

Provide a list of all the ILEC wire centers in Massachusetts to which you have obtained transport facilities (i.e., any facilities that, directly or indirectly, provide connections to wire centers) from a supplier other than the incumbent LEC (including wholesale providers and non-certificated providers, and the names of such providers).

MCI's Supplemental Response:

MCI does not obtain transport facilities, as that term is defined in the Triennial Review Order, from non-ILEC suppliers.

Question 5:

State whether you are affiliated with the ILEC in any way or with any other carrier (including intermodal providers) that serves the same transport route. If so, please describe the affiliation.

MCI's Supplemental Response:

No.

Question 6:

Identify the points within Massachusetts at which you connect your local network facilities to the networks of carriers other than the incumbent LEC, including interconnection with other CLECs, interexchange carriers, or internet service providers at any point of presence ("POP"), network access point ("NAP"), collocation hotel, data center, or similar facility.

MCI's Supplemental Response:

The requested information is highly confidential, competitively sensitive trade secret information. Subject to the protections of the protective order in this proceeding, MCI is submitting the requested information in the attached confidential document.

Question 8:

Provide a list of all ILEC wire centers in Massachusetts at which you connect a collocation arrangement to a facility or collocation arrangement belonging to another carrier, and for each, identify the carrier and the capacity or type of connection.

MCI's Supplemental Response:

None.

Question 10:

If the above question is answered in the affirmative, please answer the following.  
As to each pair of central offices, identify:

- a. The common name, address and CLLI code for each pair of central offices,
- b. The number of dark fiber pairs terminating at each of the physical collocation facilities,
- c. Whether the facilities have been lit by the carrier attaching its own optronics, and if so, the transmission level of each such lit circuit, and
- d. The term of the IRU.

MCI's Supplemental Response:

Not applicable. See response to DTE-CLECs-9.

Question 12:

For each facility identified in the previous response, indicate whether you are providing the facility to yourself, or on a wholesale basis to another unaffiliated service provider. If providing facilities on a wholesale basis, indicate the names of such unaffiliated service providers.

MCI's Supplemental Response:

MCI is continuing to research the requested information and will provide a further supplemental response as expeditiously as possible.

Question 13:

Please identify whether you are affiliated in any way with Verizon or any other carrier (including intermodal providers) that provides loop facilities to any of the locations identified in the above response, and describe any such affiliation.

MCI's Supplemental Response:

No.
